

HR TOTEM

HR TOTEM

HR Totem is the new multi-functional terminal of Zucchetti AXESS family of products.

It has been designed for all applications where an easy interaction of the workforce with the company Information System is required, and, it is not the privilege of only those with a PC on their desk.

EASY AND FLEXIBLE

Web technology, applied to companies' information systems, has allowed productivity improvements by making more information available to more people. This trend is growing increasingly faster in high tech companies; but what about the larger part of the workforce that does not work using PCs? How can they have access to the same services that are normally available to their "office" colleagues?

HR Totem is the answer to those questions. The elegant, yet robust design features a bright TFT 10,4" 640x480 display 65.000 colors touch screen housed in a IP64 splash-proof case that makes it suitable for industrial and/or commercial sites. HR Totem is powered by Windows XP Embedded and has a rich set of internal connections such as RJ45 10/100/1000 Mbit Ethernet, SD slot and USB connectors all supporting memory keys or cards as well as other devices (WiFi, GSM modem...).

It can be equipped with an internal dual RF 125KHz reader, or a single Legic reader or a dual 13,56MHz read only. Also available the Fingerprint optional module to perform biometric identification of fingerprints. It is possible to connect external barcode and magnetic readers.

HR WORKFLOW AND MORE APPS AVAILABLE

T&A, Canteen and HR workflow applications are already available for HR Totem. The HR Workflow application, for example, is a client interface to the HR server that allows employees without a PC, to request holidays, authorizations for travel expenses or perform system inquires regarding working balances, to name a few

Other applications can be easily developed in standard languages, such as ".Net" or "html".

HR Totem integrates SW support and drivers to use with all Automatic Identification technologies, in all types of application from Telnet to Web servers, to Windows remote desktop.

preliminary

TECHNICAL CHARACTERISTICS

Processor	INTEL ATOM 1.2 GHz
RAM memory	DDR2 512MB 667 MHz - Can be expanded up to 1GB
Flash memory	512MB - Can be expanded up to 4GB
Flash expansion	2 GB HD compact FLASH SD/SDHC/MMC memory card and/or USB memory key
Display	TFT 10,4" – 640x480 pixels – 65.000 colors
Touch screen	Touch Screen resistive type
Speaker	Speaker (mono)
Power Supply	15 Vdc (external power supply) Optional 10,8 Vdc Li-Ion battery
RFID readers	Dual RFID 125 KHz Single Legic Reader Dual RFID 13,56 MHz Read only 2 TTL ports (magnetic emulation)
Biometric reader	Capacitive 508 dpi, AES 256 code (optional)
Connections	1 Ethernet port 10/100/1000 Mb 2 serial port RS232 (COM1 and COM2) 1 serial port RS485 (COM3) 4 HOST USB 1.1 - 2 USB 2.0 port (ultraspeed) WiFi 802.11 b/g (optional) - GSM/GPRS (optional) VGA video output - AC3 audio output - Microphone IN SD/SDHC/MMC
Input/Output	4 digital output (relè output, 1A – 24Vdc max) 4 digital input (optoisolated)
Housing	ABS V0, auto-extinguish
Dimensions	313 x 214 x 72 mm (HxLxP)
Weight	2,5 Kg
Operative System	XP Professional Embedded Linux distribution also available
Other services	Ftp server WEB Server I.E.6 Remote desktop client Internet browser
